Planning for college requires intense coursework in STEM as well as excellent reading and writing skills. This summer we are launching a program tailored for rising High School Seniors (12th grade in Fall 2021).

This program will challenge students with math and chemistry coursework. Mathematics and Chemistry are gateway courses for many STEM majors. The program will emphasize analytical reading and writing in STEM areas. All courses will be taught at the college level with academic support at all levels.

Finally, this program will offer authentic research experience, putting theory into practice. This authentic research will form the basis of a JSHS research submission for the Spring 2022 competition.

The program is offered at no cost and will run in-person (with virtual options upon request) at Temple University’s Main Campus from 9:00 AM to 5:00 PM, Mondays through Thursdays beginning July 5th and ending August 12th.

There is an application process and the deadline for applications is June 1, 2021.
